Subject: Microsoft Settlement

Dear DOJ:

I understand that according to the Tunney rules I can comment on the DOJ settlement with Microsoft.

As a long time Microsoft customer, who has used a wide variety of their products, I can say that the settlement is a very bad idea. Microsoft is a ruthless monopoly and predatory organization that has set back the progress of American innovation by ten or more years.

Unchecked, Microsoft will continue to abuse consumers and think of itself as outside the law.

The DOJ should rethink the settlement and act quickly to break up Microsoft.

Regards,

Ashley Grayson
